-

IT Technician | Academedia

Jan 2018- Mar 2022

Firstline -> Secondline -> Thirdline

- Windows server management (OS-level) primarily
- Some very small and simple projects on Microsoft Azure
- Accidentally did a bad DNS modification which lead to a very large main site being down for a couple of hours..
- Managed Microsoft 365 & Exchange Online
- System manager for Airwatch & Apple School Manager (MDM)
- Planned and executed a rebuild of the MDM setup
- Handled alarms for network equipment on hundreds of sites
- Setup and configured network equipment on multiple sites
- In-house, remote and on-site support for issues related to devices, networks, accounts & systems

Mac Technician / Site Manager | Digital Inn

Okt 2014 - Dec 2017

Repaired Apple hardware such as Macs & Thunderbolt displays while later also acting as the site manager

- Apple Certified Macintosh Technician 2015
- Lots of stats to try and hit while maintaining customer satisfaction
- Forgot to unplug a iMac PSU or two while doing repairs.. zapp
- Towards the last year I started another serviceshop for the company and became the service manager

Support Technician | Uniflex

Feb 2013 - Okt 2014

Technical phone and chat support for customers

- Supported computers, smartphones, tablets, routers, switches, OS, software and cloud services.
- Had a very high customer satisfaction score

Lessons learned

- Power Supply Units can *really* zapp you..

- Be humble and grateful for new experiences

- Tech aside, we're all just humans.

- It's always DNS..
